RE: Section 6(a)(2) March Incident Filing

Dear 6(a)(2) Administrator:

On behalf of Reckitt Benckiser, Scientific & Regulatory Consultants, Inc. (SRC) is submitting the enclosed documents containing alleged adverse effect incidents for products listed below. SafetyCall is a primary gathering source for incidents, though internal reports for calls/correspondence received directly at Reckitt Benckiser are also included. SRC is acting on Reckitt Benckiser's behalf by assisting them in registration actions and their reporting requirements in accordance with FIFRA section 6(a)(2).

The EPA Registration Numbers with adverse effect incidents for this filing are:

- 777-99
- 777-81
- 777-94
- 3282-66

These incidents are being reported in compliance with 40 CFR § 159.184 and have been assigned the H-C severity classification. If additional information is needed, please feel free to contact us by e-mail (bmacdonald@srcconsultants.com or akline@srcconsultants.com) or by phone at 260-244-6270.

Sincerely,

A handwritten signature in black ink, appearing to read 'Bob MacDonald'.

Bob MacDonald
Consultant (SRC)
Agent for Reckitt Benckiser

A handwritten signature in black ink, appearing to read 'Ann M. Kline'.

Ann M. Kline

Brief description of incident circumstances.

O'Rourke, Carrie Mar 19 2013 2:19PM

Warm Transfer- Jamal

Hx. Caller states that she believes she was poisoned approx. 2-3 months ago by a male. She believes it was mixed in with her food. She has since experienced muscle pain in her legs and arms, and joint pain in her knees, ankles, and shoulder. Caller has had misc. swelling on her joints as well. Caller states she did not taste anything and it is not confirmed that she was poisoned, but she would like exact sxs of an ingestion. Caller has not reported the possible intentional homicide.

A. This is a LAAC. You would need to ingest approximately 25g of the product before we would need to worry about s/sxs developing. Most people do not ingest much, as the product has a bitter taste that people don't like. Discussed LAAC s/sxs; spontaneous nose bleeds, small cuts that continue to bleed, blood in urine/stool. I would not expect these sxs to occur from the possible ingestion. Explained to the caller that she would probably taste and see the product if it was mixed in with something, and she most likely did not ingest enough to cause an issue, if any was indeed ingested. Rec. MD consult due to sxs. Rec. contacting local law enforcement about the possible intentional poisoning. Provided case #. Callback 24/7 if you have any other questions or concerns.

Notified LT.
